

What Buyer Gets

HumanOS AI handover checklist for acquisition or white-label transfer.

Product Modules

- Landing page and premium SaaS dashboard.
- AI chat assistant with message history.
- Memory, tasks, goals, career copilot, document copilot, agents, planner, pricing, and settings pages.
- Dark/light mode and responsive UI.

Technical Stack

- Next.js 15 + TypeScript + Tailwind frontend.
- FastAPI backend with SQLAlchemy, Alembic, and Pydantic.
- PostgreSQL relational database and Qdrant vector database.
- OpenAI integration, Clerk auth, Docker Compose, Vercel config, Railway config.

Deployment Assets

- Frontend deployment path for Vercel.
- Backend deployment path for Railway.
- Railway PostgreSQL setup notes.
- Qdrant Cloud or Railway Docker option.
- Environment variable documentation.

Buyer Must Replace

- OpenAI API key.
- Clerk publishable and secret keys.
- Database URL and Qdrant URL/API key.
- Domain, brand assets, legal pages, and payment keys.
- Support email and company details.

Recommended Handover Flow

- Demo the live app and modules.
- Share source repository or transfer private GitHub repo.
- Buyer creates production OpenAI, Clerk, Railway/Vercel, PostgreSQL, Qdrant, and payment accounts.

- Configure environment variables and redeploy.
- Complete acceptance test: signup, chat, task creation, document upload, memory page, dashboard, and settings.
