

HumanOS AI Pricing Proposal

Acquisition proposal for a full-stack AI SaaS product asset.

Package	Includes	Price
Source Code License	Frontend, backend, schema, Docker, docs, deployment config, sales kit.	Rs. 5,00,000
Optional Customization	Branding, new modules, payment provider, domain setup, enterprise flows.	Quoted separately
Support Window	7 days handover support for environment setup and deployment guidance.	Included

Scope Included

- Complete source code repository and deployment configuration.
- Frontend SaaS dashboard, landing page, auth pages, settings, pricing UI, and app modules.
- FastAPI backend routes, SQLAlchemy models, Alembic migrations, PostgreSQL schema, Qdrant integration, and OpenAI integration.
- Documentation for local setup, Vercel frontend deployment, Railway backend deployment, PostgreSQL, Qdrant, Clerk, OpenAI, and environment variables.
- Buyer handover guidance for replacing keys, domain, branding, and payment provider configuration.

Commercial Positioning

- This is best sold as a white-label AI productivity/career SaaS foundation.
- The buyer receives a deployable codebase and can continue development with their own team.
- Payment gateway enforcement can be customized for Stripe, Razorpay, Lemon Squeezy, Paddle, or a buyer-specific provider.

Recommended Terms

- Ask price: Rs. 5,00,000 for the full product asset.
- Collect at least 30%-50% upfront before private repo transfer or production handover.
- Use a simple sale agreement that states license/ownership, support period, exclusions, and confidentiality.
- Do not transfer personal API keys, billing accounts, or private customer data. Buyer must use their own production accounts.
